iVIEWS IMAGING

medical informatics system

MAKE A DIFFERENCE IN YOUR PRACTICE THAT YOUR PATIENTS CAN SEE

iViews Imaging System has emerged as the most efficient and complete solution available for patient imaging management and review. Unlike other imaging systems that simply catalog and retrieve diagnostic images and data, iViews converges the information in real-time, in high-resolution and in a dynamic, interactive format.

Now visits can better educate the patient with a visual comparison of new versus prior diagnostic images and data, resulting in improving their understanding of the diagnosis.

Case Study #103
Dr. Maurice Landers
UNC Chapel Hill
Department of Ophthalmology

Challenge Presented
Our previous system was just archival and the client was not satisfied with the system.

iViews Solution and Results
iViews now quickly and effectively provides results, right from the examining room, incorporating any type of testing equipment that the practice has in it's clinic. and making the images and data accessible and viewable. We can also access these results from anywhere, from home or the office or the satellite clinics, wherever.

"I have been very satisfied with and have recommended iViews Imaging Systems to many of my colleagues. I am not aware of any Imaging System that is superior to iViews in performance and cost. We like it, It works and it does the job."
